## EDUCATION

### Bachelor of Engineering: Computer Science

Universal College of Engineering - Mumbai

06/2018 - 06/2022

CGPA: 8.81

## WORK EXPERIENCE

### Full-Stack developer

Dustecosystem

08/2022 - 10/2022

*Achievements/Tasks*

- Designed and developed an ecosystem website for an **NFT** project from scratch using **NextJS**, **TailwindCSS**, **Firebase Database**, and **NextAuth**, with **server-side rendering and APIs**.
- Implemented features such as **adding, deleting, and updating projects**, **Twitter authentication**, and **user voting**.
- Utilized **Tailwindcss** to build a pixel-perfect **interactive user interface**.

### Frontend and Python developer

Startup

03/2021 - 05/2021

*Achievements/Tasks*

- Designed an **Instagram post-scheduling** tool that allows users to schedule posts for **specific dates and times**.
- Implemented a **user-friendly interface** and **dynamic** front-end functionality using **HTML**, **CSS**, **JavaScript**.
- Developed a **Python** script that schedules Instagram posts at a specific time and date, and incorporated it into the backend using **Flask**.

## ACHIEVEMENTS

- Manged and Contributed in open source project based on Discord.py and MongoDB
- Collaborated and guided a group of 12 CyberSecurity enthusiasts to visit Imedita in Pune
- Won Computer Society of India's website development challenge (09/2020)
- Won HueHacks Hackathon (03/2021)

## SKILLS

Javascript

ReactJS

Hooks

HTML/HTML5

CSS/CSS3

Context API

Responsive Design

Python

MongoDB

Tailwind CSS

Debugging

NextJS

Firebase

Devtools

Framer Motion

## PROJECTS

### BirdApp, Full-stack Developer

- Modern React 18, Twitter clone App. NextJS, a React based framework, was used.
- Implemented a familiar, Twitter-like interface, allowing users to post, read, and interact with text-based and image-based content.
- Allows users to like and delete the post.
- Tech: React, NextJS, JavaScript, HTML, TailwindCSS, Firebase. [\[git\]](#)

### NFT Marketplace, Frontend developer

- Modern React 18, NFT marketplace frontend.
- By utilizing React and TailwindCSS to bring the design to life, I was able to create a usable website based on a Figma design.
- Utilized React and TailwindCSS to bring the Figma design to life, resulting in a visually appealing and user-friendly frontend for NFT marketplace. [\[git\]](#)

### TragicSimpBot , Python developer

- Developed TragicSimp, a Discord bot that distributes **memes, quotes, jokes, and facts** to users.
- monitoring user statistics and ranking them according to how active they are in a particular Discord channel.
- utilized a **MongoDB** database to store and track user statistics. TragicSimp had over **500** active users.
- Tech: Python, Pymongo, Praw, Discord.py, APIs.

## CERTIFICATES

- Python for Everybody Specialization - Coursera
- Complete ReactJS developer bootcamp

## SOFT SKILL

Project Planning and development

Time Management

Problem-solving

Teamwork

Curiosity
